Pembo, Taguig City • 09398059318 • angelocabangal01@gmail.com • github.com/GeloyC

OVERVIEW

Emerging Web Developer with hands-on experience building full-stack web applications. Proficient in JavaScript across modern frontend frameworks like React and Next.js, as well as backend technologies including Node.js and Express.js. Experienced in managing relational databases like PostgreSQL and MySQL, and integrating RESTful APIs. Eager to leverage these skills to contribute to both frontend and backend development in an entry-level role.

WORK EXPERIENCE

Web Developer Intern – Top Provider Realty and Development Corp - February 2026 – June 2026

- Developed a full-stack web app using Next.js and Express.js to showcase 150+ rental units, successfully capturing user leads through direct form submissions.
- Designed a PostgreSQL database schema to track room availability and handle incoming inquiries, optimizing data organization and backend response times.
- Managed the end-to-end development lifecycle as the sole developer, integrating frontend components with RESTful APIs to digitize manual occupancy tracking.

Senior Graphic Designer - ClutchPoints - Nov 2023 - PRESENT

- Produced 10 to 25 high-quality sports posters and article thumbnails daily, meeting strict 15 to 60-minute deadlines to keep pace with rapid social media cycles.
 - Collaborated closely with social media managers to execute creative directions, ensuring all visual assets aligned perfectly with the company's brand identity.
 - Streamlined personal design workflows to maintain a high-volume output, successfully driving user engagement across various social media platforms.
-

PERSONAL PROJECTS

Capstone Project (WhiskerWatch) – STI College Global City - July 2025

- Led a 4-member engineering team as the Lead Developer to build a full-stack stray cat tracking and adoption web app using React, Express.js and MySQL.
- Supervised the codebase by writing core architecture and conducting peer code reviews, ensuring code quality and seamless alignment between frontend components and backend APIs.
- Engineered data schemas to track daily feeding logs and detailed adaption profiles for over 200 cats, successfully digitizing community-wide animal welfare operations for the client.

Bookmark - 2025

- Built a full-stack link-saving web application from scratch using Express.js to practice designing and implementing standard RESTful API architecture.
 - Developed complete CRUD functionalities to allow users to smoothly create, read, update and delete saved URLs within the interface.
 - Integrated backend data processing to automatically log timestamps and format clickable redirect links, optimizing user navigation and link management.
-

EDUCATION

STI College Global City – BS in Information Technology – July 2026

TECHNICAL SKILLS

Frontend Frameworks: JavaScript, React, Next.js, HTML, CSS

Backend & Database: Node.js, Express.js, PostgreSQL, MySQL

Tools & Others: Git & GitHub, UI/UX design
